Business and sustainability

Charity and development, not a business project

All donors over 20 000 EUR get full access to financial data of VR Cars Ltd. – to see how donated money is spent

Ukraine – best proving ground for military vehicle

Tested car – not only good investment in Ukraine freedom fight, but also strengthens National Armed forces

Built according to NATO standards, usable for all Alliance members and Allies

Lend-lease for Ukraine, gain – for Homeland

All FOX cars are sent to Ukraine on lend-lease terms

All destructed vehicles stay in Ukraine

All survived vehicles are returned to Latvia or are sold to Armed Forces of Ukraine

Returned vehicles are handed over to National Armed Forces

Money raised for sold cars is given to National Armed Forces to purchase new FOX vehicles

Returned and purchased vehicles are handed over not only to Latvian, but also other Armed Forces, according to total amount of donations from each country

VR CARS

VR Cars Ltd. was created when two well-known Latvian racing companies – Vagi Racing and Baltic Motorsport Promotion, each with more than 10 years' experience in racing business – merged to design and develop purpose-built military vehicle.

In 2020 Grant agreement was signed between Ministry of Defence of Latvia and Baltic Motorsport Promotion Ltd. for designing and developing VR FOX military vehicle. In 2022 production of first two prototypes commenced. First prototype vehicle was presented to public in September 5, 2022, in Adazi Military proving ground. Two months later – during Latvia Independence Day on November 18 – vehicle was showcased in Military Parade of Latvian Armed Forces.

Prototype vehicle design, engineering and production was done in Vagi Racing workshop in Jaunmarupe – it is also home of VR Cars Ltd. VR Cars have the necessary tools, equipment and expertise to produce 20 pcs of VR FOX in 2023, with not less than 50 more units to be produced in 2024.
